London, Oct. 26 .- The last ceremonie

London, Oct. 26.—The last ceremonies connected with the inauguration of the reign of King Edward VII occurred today, when the king, accompanied by Queen Alexandra, the Prince of Wales and almost all the members of the royal family, drove to St. Faul's cathedral and offered up thanks for the recovery of his health, which had, enabled him to be crowned.

The Honorable Artillery company formed an imposing line: the members wore their busiles, and carried fixed bayonets. Before the service was over several of the artillerymen had fainted as a result of long standing.

The choir, the chapter and the Bishop of London, the Right Rev. Arthur Ingram, escorted the king and the queen to the throne under the reredos. There was a full choral service of thanksgiving followed by a sermon from the Bishop of London, who laid special stress upon the fact that this was the second time in his majesty's tige thanks for his recovery from a dangerous illness. At the conclusion of the sermon the "Te Deum", was sung.

the United States.

Liverpool, Oct. 28.—Vice Admiral Lord Charles Beresford arrived here today from New York on the Cunard line steamer Umbria. In the United States Lord Beresford studied the construction of American battleships and also investigated shipping matters. He was interviewed on his trip to America and said he had had a splendid reception in the United States, and that he could youch for the genuineness of the kind sentiment entertained in America for Great Britain. He said his investigations on the other side had convinced him that Great Britain had nothing to fear from the International Mercantile Marine company. On the contrary, he believed this combine would benefit England commercially and otherwise. "The United States," said the admiral, "is certainly ahead of us in engineering and administration, and we need to adapt ourselves to modern ideas."

Continuing, Lord Beresford said he did not take a pessimistic view of the situation, and did not agree that Great Britain was going down hill. Prominent men ought to strive to bind he two great countries more firmly together.

WASHINGTON, Oct. 26.—All is in readiness for the meeting tomorrow of the coal strike commission. All the members of the commission are in the city and most of the operators or their representatives are The meeting will be called to order at 2 o'clock and the wishes of both parties to the controversy will be considered as to the method of procedure in securing testimony. Plans for holding the public sessions, places of meeting and various other details necessary to be settled before the actual work of taking testimony can be begun, will be decided. No testimony will be taken tomorrow. It is expected that very little evidence will be heard in Washington, as it is not the desire of the commission to compel the attendance of witnesses here when the evidence they have to give can be secured at greater convenience to them at or near their places of residence.

The commission will also determine whether it will give hearings to persons not having a direct interest in the issues at stake between the miners and operators, but who believe they can give evidence of a practical character that will assist the commission in its work. Considerable evidence of this character was taken by the commission which reported on the Chicago strike, but unfortunately it was not of material value in assisting that body to arrive at its conclusions.

Five of the mine operators or their representatives arrived here tonight. They included President George F. Baer of the Reading, E. B. Thomas of the Erie, John B. Volkman had offered to allow the apple to be placed on his head. Meinit began shooting at a distance of about twenty feet. The first two shots failed to hit either the apple or the man, but the third struck Volkman in the forehead, and he dropped to the stage and died within an hour.
